

I am pleased to advise the Stage 1C Bulk Excavation Project picked up the Site Safety Civil Construction award at the MBA Excellence in Construction Awards last night.

It was particularly pleasing to read the comments of the judging panel who said the Ward submission ***“was a pleasure to judge”***, that our safety processes were ***“followed flawlessly, procedurally perfect”*** and compared our containerised removal of contaminated material from the basement of the Crown Resort to the ***“inner workings of a Swiss watch”***.

Thanks for all of your support on this project. It is good to receive such positive industry recognition for a job well done.

Kind regards
